RELEVANT EXPERIENCE

ROOTCODE | SENIOR DEVELOPER

March 2023 – Jan 2024 | Sakala, Estonia (remote)

- Actively involved in full stack development with **React**, **React Native** for front-end and **.net 8** | NodeJS for back-end micro services
- Engaged in architecturally shaping a multi-tenant product on **AWS**, incorporating Google Calendar, Stripe, Slack integration on top of **micro services**
- Influenced in deciding technologies and refactoring project structure to support clean architecture.
- Conducted few event storming sessions with stack holders to identify requirements
- Initiated CI/CD automation through **GitHub Actions**, **semantic releases**, Slack notifications and related technologies resulting in a significant reduction in feature deployment time.

Technologies & Tools: React, React native, C#.net, ASP.NET Web API, Rabbitmq, DDD, Clean architecture, AWS, EC2, Cognito, amplify, S3, Docker, Jenkins pipelines, Github actions, atomic design, Jest, RTL, Storybooks, Code magic, fastlane

VERICO PERMITTO | SENIOR DEVELOPER

2018 -2021 | Stavanger, Norway (remote)

- Led a team of four with full stack development using react, react native and **.net core** back-end.
- Played a key role in implementing the integration of **geolocation tracking** with offline support for Android and iOS applications using React Native. This functionality became one of the most utilized features within the mobile app.
- Employed Jest and cypress for front-end testing and utilized **NUnit** for backend testing in the .NET environment.
- Collaborated on pair programming sessions with norwegian team members.

MILLUM | SENIOR DEVELOPER

2016 -2018 | Oslo, Norway (remote)

- Refactored ASP.net MVC application to **Angular 2**, which helped to increase user experience thus observed drastic increase in orders via millum web portal.
- Contributed on quick completion of millum commerce mobile app with **ionic2** and **angular2** with **Typescript** support in 3 months which resulted in a considerable increase of order submissions via mobile.
- Played lead role/ Scrum master role of maintaining code quality through peer reviews and pull requests.

Technologies & Tools: C#, ASP.NET, CQRS, Domain driven design, Entity framework, Ionic2, Angular 2, Typescript, Mongo db, micro services, MSSQL

BLUE TAG | SENIOR DEVELOPER

2014 -2016 | Stavanger, Norway (remote)

- Played lead role of managing 10-12 team members on fast tracked development with scrum/ Kanban methodologies.
- Restructured an ASP.NET application to use **MVC** with **Razor** views and subsequently integrating **AngularJS** to enhance and accommodate expanding dynamic functionalities.
- Utilized tools such as Jenkins, SonarQube to measure code coverage and to improve code quality.

SKILLS

PROGRAMMING LANGUAGES

- C#
- JavaScript (ES2015+), TypeScript
- HTML, CSS

LIBRARIES & FRAMEWORKS

- React | React native | Vite
- ASP.NET Core | Entity framework
- React hooks | React query | Zustand | RTK | Redux | Mobx
- Tailwind | AntD | MUI | Styled components
- Git/Github
- Sqlite | ms sql | my sql | Mongo | fire-store
- XUnit | StoryBook | Jest | RTL
- Docker | Fastlane | Codemagic | Fire-base App distribution

OTHER

- Micro services | clean architecture | DDD | SOLID | OOP

PROCESSES

- Scrum | Kanban | Jira

EDUCATION

UNIVERSITY OF COLOMBO

Master of Computer Science

2010 -2012 | Colombo, Sri Lanka

Master of Business administration

2012 -2014 | Colombo, Sri Lanka

Bachelor of Computer Science

2005 -2008 | Colombo, Sri Lanka
